Experienced & kind nanny in Luxembourg city

[] Childcare

If you're searching for a kind and warm-hearted nanny, who is responsible and love taking care of children please let me know. I'm patient and empathetic so I understand children's perspective and their point of view but at the same time I'm also diplomatic which gives it balance to create trustful and respectful relationship between me and children. We create special bonds so that's why this work is so special and inspiring for me. In the end of the December I'm moving to Luxembourg city so now I'm searching for a job. I would love to work as a nanny ❤ I gratuated as a engineer of logistics but I have years of experience of working with children. I was already working as a nanny and children entertainer. I had also many different workshops in the youth center, schools, kindergartens, summer camps... Different volunteering works in Africa, Brazil and also in Slovenia. With children I love walking and playing in the nature or playground, I love singing and dancing with them, different creative workshops and reading fairytales. I'm flexible and willing to help so I would love to help you also with cooking, taking care of pets and helping with any other household chores that are needed. I am fluent in English and Slovene, but I also understand and speak some German and Croatian. I also understand some basic Spanish and Portuguese words. This year I'm starting to learn also French. I also have driving license. I can start working in the beginning of January. I already have a place to live so I'm not searching for au pair work. For more information about me please let me know. I'll send you my CV and application. You can send me email to anisakelenc@gmail.com or via Whatsapp. I'm looking forward to hearing from you. Thank you for your consideration ❤
