

Learn mathematics with Ana!

[] Tutoring and education courses

Someone who loves education, possesses excellent organizational skills and can connect easily with students! I am a Georgian student living and working in Luxembourg. Currently, I am studying my Master while at the same time providing lessons for those who wish to gain knowledge in mathematics. My tutoring experience dates back to my high school years when giving lessons in mathematics and Georgian language to foreign students. It's been 9 years of my tutoring experience. I have been working not only as a private tutor of mathematics, but also as a school teacher. With each student, I make sure that they fundamentally understand the concepts in question and are capable of working independently. Moreover, I am very communicative person and I always make sure that the student is fully involved in the lesson. My approach to studying involves questioning, discovery, inductive, deductive, analytic and problem solving methods. If you are interested, feel free to contact me ^^
