

Language Tutor (See languages below)

[] Tutoring and education courses

My name is Ayumi, I have been working as a language tutor for 7 years, mostly working with kids of all ages. I tutor in French, Luxembourgish, German, English and Spanish. I have a degree in psychology which has given me the necessary experience and knowledge in working with kids with learning disabilities, such as ADHD/ADD, Dyslexia, and Autism. My study plan is personalized to the student and their specific needs, whether it be for school, work setting, or leisure, we focus on the areas that you need more help with. If it's for school, I can offer a tailored plan based on the areas you struggle with the most so as to catch up with your peers, or utilize the teacher's materials as to just act as an aid. Please contact for further information on prices and scheduling inquiries.
