

Experienced Mathematics Teacher

[] Tutoring and education courses

I work with students of different ages and levels, from secondary school to university level. I teach Mathematics according to British, European and international programmes, including IB, IGCSE, GCSE, A-Level and European Baccalaureate, as well as university Mathematics. My lessons are structured, clear and focused on real progress. I explain difficult mathematical concepts in a simple and logical way, identify gaps in knowledge and help students build confidence step by step. I can help with: improving school and university results; preparation for tests and examinations; IB, IGCSE, GCSE and A-Level Mathematics; European School Mathematics; university Mathematics; Calculus and Mathematical Analysis; Linear Algebra; Statistics and Probability; entrance examinations and university preparation; advanced Mathematics. I adapt every lesson to the student's level, goals and learning style. My aim is not only to help students solve particular exercises, but to teach them how to think mathematically, understand the underlying ideas and work independently. I teach in person in Luxembourg and online. Languages of instruction: English, Russian and Ukrainian. French can also be used when necessary. If you are looking for an experienced, demanding but supportive Mathematics teacher for school, exam preparation or university studies, I will be happy to help you achieve your goals.
