

Grade 9 Math, English or Science

[] Job offers

I am looking for a tutor to help my daughter with math, science and English. Help with just one subject is ok too, I don't mind finding different tutors for each subject. She is in an on-line school in Grade 9, following a Canadian curriculum and needs help with checking her work. A university student or someone finishing Lycee would qualify. 15/hr, very flexible hours, about 2-3 hours per day, but it does not have to be every day.
